

Northwestern University's
Midwest Academic Talent Search

The Center for Talent Development is again sponsoring NUMATS for the 29th year! Students can access above grade level tests for a fee (such as the ACT or SAT) in order to become more acquainted with these types of tests and receive valuable information on planning for their future. Middle School students in grades 5-8 can participate in NUMATS by qualifying MEAP scores (in the 90th to 92nd percentile or higher – if you can't find your old scores, please contact Jen Butz in the Middle School). If anyone is interested please go to www.ctd.northwestern.edu/numats for more information and registration (there is a fall deadline).
