

Biology Syllabus

Objective: The biology course is designed for students to develop an understanding of fundamental principles of living organisms. Biology is a college preparatory course that will prepare students for the future study of science.

Topics: The specific topics covered in term 1 are based upon the objectives written in the State of Michigan science curriculum. The topics for term 1 are listed below:

- Scientific Method
- Characteristics of Living Organisms
- Biochemistry
- Cell Structures
- Cell Growth and Division
- Cell Respiration
- DNA and Protein Synthesis
- Genetics
- Evolution

Materials: Students will be expected to bring the following materials to every class.

- Biology textbook
- Pencil or Pen
- Spiral notebook or 3 ring binder
